Choking Charlie is a lifelike manikin which realistically simulates a choking victim who is unable to speak or breathe due to a foreign body airway obstruction. It is specifically designed for training the Heimlich Abdominal Thrust Maneuver.

The manufacturing quality of this simulator should provide many sessions of training when reasonable care and maintenance are practiced.

Laerdal Recommends:

Be sure bolus is lodged tightly down throat of Choking Charlie. No air should be escaping. This will assist in efforts to expel bolus when performing the Heimlich Abdominal Thrust Maneuver.

Items included:
- (1) Choking Charlie Torso
- (4) Replaceable Boluses
- (1) Bottle of Talcum Powder
- (1) Tank Top
- (1) Carrying Case

Skill Taught:
- Heimlich Abdominal Thrust Maneuver
Preparing Manikin for Use:

Inserting Bolus:

1. Apply a small amount of talcum powder to bolus before inserting into mouth.
2. Using index finger and medium pressure, push bolus past first point of resistance just inside throat.

*Do no store bolus in mouth when not in use.*

Laerdal Recommends:

Talcum powder is used to simulate normal saliva in throat and should be applied frequently to reduce friction between bolus and mouthpiece.

Be sure bolus is lodged tightly down Choking Charlie’s throat. No air should be escaping.
**Instructions for Use:**
1. This simulator can be used to simulate a conscious victim or an unconscious victim.
2. Perform procedure for a foreign body airway obstruction (FBAO) in accordance with the currently recognized standards.

**Care and Maintenance:**
1. Clean with mild soap and water; do not submerge manikin or parts in cleaning fluids or water.
2. Use only on clean surface. Avoid felt tipped markers, ink pens, acetone, iodine or other staining products and avoid placing the manikin on newsprint or inked lines of any kind.
3. To ensure longevity, each manikin should be cleaned after each training session and a general inspection should be conducted regularly.
4. Store properly between teaching sessions.

**Warranty**
Laerdal Medical warrants to the purchaser that its products are free from defects in material and workmanship for a period of one (1) year from the date of purchase by the original user. During the designated one (1) year period, Laerdal Medical will, upon receipt of a product found to be defective due to materials or workmanship from the purchaser and notification in writing of the defect, at its option repair or replace any parts found to be defective or the entire product. Warranty period does not renew with replacement or repair of original product.

Products found to be defective and notification of defects may also be sent to the authorized Laerdal Medical dealer from whom the product was purchased. All postage, shipping or handling charges shall be the sole responsibility of the purchaser.

Laerdal Medical is responsible for the effects of safety, reliability and performance of its product(s) only if:

- service, repair, readjustment or modification is carried out by Laerdal Medical or persons authorized by Laerdal Medical.
– the electrical installation of the room where the product is used complies with pertinent equipment requirements.
– the product is used in the proper manner in strict compliance with its Directions for Use.

Laerdal Medical shall not be liable under this warranty for incidental or consequential damages, or in the event any unauthorized repairs or modifications have been made or attempted, or when the product, or any part thereof, has been damaged by accident, misuse or abuse. This warranty does not cover batteries, fuses, normal wear and tear, excessive use, staining, discoloration or other cosmetic irregularity which does not impede or degrade product performance.

Some states in the USA do not allow the exclusion or limitation of incidental or consequential damages, so those limitations or exclusions may not apply to you.

There are no other express or implied warranties, whether of merchantability, fitness or purpose, or otherwise, on the product, its parts and accessories.
