

Rapid integration of nursing education with simulation scenarios.

Scenarios build core nursing competencies for students

Enhance your simulation-based education by integrating 20 preconfigured scenarios into your training program.

This package contains 10 basic and 10 advanced cases designed to challenge nursing students at varying levels. Cases range from obtaining vital signs through recognising and managing life-threatening medical complications.

These scenarios are mapped to the 2007 National Council Licensure Examination-Registered Nurse (NCLEX-RN) test categories which promote:

- Safe and effective care environment
- Health promotion and maintenance
- Psychosocial integrity
- Physiological integrity

The scenarios package includes the following:

- Pre-programmed scenarios
- Patient ID bands
- Patient information card
- Data collection forms
- "Simulation in Nursing Education" book
- Physician orders
