Virtual Phlebotomy™

Virtual Phlebotomy is a comprehensive, self-directed learning system for training phlebotomy from the novice to the expert level.

Powerful 3D graphics and a force feedback device provide absolute realism in appearance and feel when performing the procedure, creating an immersive environment that promotes involvement and learning.

Virtual Phlebotomy is Laerdal's most comprehensive and accurate virtual experience to date. It assesses all cognitive and motor skills from patient

interaction, to motor skills during venous access, to proper order of draw, to proper specimen handling and mixing, to proper tube labeling.

Virtual Phlebotomy conforms to CLSI (formerly NCCLS) and OSHA standards and guidelines. Training objectives and assessment correspond to CLSI guidelines.

Improves Training Effectiveness:

- Standardizes educational content
- Standardizes training methodology
- Standardizes performance measures

Optimize Training Time:

- Improves availability and quality of classroom time by allowing instructors to focus on highest educational priorities
- Helps instructors identify student needs and optimize their programs
- Students learn with less instructor time

Multi-level Applicability:

- Initial education
- Continuing education

Improve Student Learning Experience and Motivation:

- Rich content, immersive simulations and game-like challenges engage today's students
- Students learn at their own pace in a non-intimidating environment
- Enables students to experience abnormal, difficult or uncommon cases

Virtual Phlebotomy System includes:

(must be ordered separately)

- 280-20001 Phlebotomy Haptics Device and Accessory Kit
- 280-00101 Desktop Computer
- 280-22401 Inhospital Module (software)
- 280-22501 Phlebotomy Anatomical Viewer

Options:

- 280-20001EXW Extended Warranty
- 280-00201 Laptop Computer

Can be purchased in lieu of the Desktop Computer

Upgrades:

- 280-04601 Virtual I.V. Upgrade Kit

Allows you to upgrade your Virtual Phlebotomy System to include Virtual I.V.
