ASPiH and Laerdal proudly present
A National Inter-Professional Paediatric Simulation Symposium

Developing effective and innovative use of simulation to improve the quality and safety of healthcare.

www.aspih.org.uk

Laerdal has been at the cutting edge of innovative healthcare training since the launch of Resusci Anne in 1960. Through the creation of high quality simulation solutions, we are committed to increasing the potential and scope of this most valued training methodology in support of our long held mission - helping save lives.

Speakers

Simulation as a method for transforming the work environment
Dr. Chris Kennedy (MD), Director – Center for Excellence in Pediatric Resuscitation, Children’s Mercy Hospital, Kansas City, Missouri, USA

Dr. Kennedy’s presentation will look at the clinical care limitations undiagnosed in the work environment and examine ways to manipulate the clinical high fidelity simulation scenario to test:

- roles in the process of multi-disciplinary care
- room design
- error recognition and remediation of immediate safety threats in the process of multi-disciplinary care
- medical decision making in the process of multi-disciplinary child abuse assessment.

Making it all worthwhile – regions national and international collaboration targeted to direct patient outcome
Dr. Steve Hancock, Transport Consultant (Paediatric Lead), Embrace Yorkshire & Humber Adult & Children’s Transport Service

Dr. Hancock will be looking at the regional, national and international simulation infrastructure as a context to:

- discuss the importance of focusing on direct patient outcomes
- reflect on the challenges for educators on the shop floor
- understand how the simulation infrastructure can help to achieve this important goal
- identify the obstacles to progress and explore how these can be overcome together

Use of simulation as an education tool to deliver bad news in paediatrics
Dr. Thomas Baugnon - Medical Doctor (MD), Staff Anaesthesiologist, Anaesthesiology and Paediatric Intensive Care Unit, Necker Hospital for Sick Children – Paris

Dr. Baugnon’s presentation will explore:

- the value of simulation in learning and developing communication skills
- the SPIKES Protocol for delivering bad news
- the results of a simulated resuscitation associated to a simulated interview to analyse communication skills.

Invitation

Friday 8th March 2013

8am – 6pm
Radisson Blu Hotel, Manchester Airport, Chicago Avenue, Manchester M90 3RA

Delegate Fees:

ASPiH Member: £85
Non ASPiH Member: £115*

*to include membership of ASPiH for twelve months
Programme

08.00 – 08.30  Registration & Coffee

08.30 – 08.45  Welcome

08.45 – 09.15  Introduction to Simulation in Paediatrics

09.15 – 09.30  Morning Workshops

10.45 – 11.15  Morning Workshops

11.15 – 12.45  Morning Workshops

12.45 – 13.00  Lunch

13.30 – 14.15  Afternoon Workshops

14.30 – 14.45  Break for Coffee

14.15 – 17.30  Afternoon Workshops

17.30 – 18.00  Questions and Close

Workshop Sessions

Morning Workshops

Simulation-instructor training and establishing
Points of Care Simulation programs across networks

Word Simulation

- Introduction to simulation terminology
- Case studies to demonstrate the value of simulation
- Teaching best practices in simulation

Structural approach to successful multi-professional debriefing

Making simulation sustainable

Making simulation sustainable

Multi-professional / Inter-professional simulation in neonatology

Children as Simulated Patients: Engaging Clinicians in Improving Care for Severely Injured Children

Practical approach to paediatric debriefing: use of the OSAD (objective structured assessment of debriefing) tool

Planning simulation through the ASPiH / HEA National Simulation Project

Afternoon Workshops

Multi-professional / Inter-professional simulation in neonatology

Children as Simulated Patients: Engaging Clinicians in Improving Care for Severely Injured Children

Practical approach to paediatric debriefing: use of the OSAD (objective structured assessment of debriefing) tool

Planning simulation through the ASPiH / HEA National Simulation Project

Registration Form

As places are limited please register early by completing and returning this section of the form with your cheque made payable to: "Association for Simulated Practice in Healthcare (ASPiH)" and return to Christine Spencer, ASPiH PO Box 262, Chester Le Street, DH3 9JL to be sure of a place on the symposium. If you have any questions about this symposium, you can contact Christine on 01744 670975 or e-mail info@aspih.org.uk

I would like to attend this symposium on Friday 8th March 2013. Please tick one of the following:

[ ] I am a member of ASPiH and enclose a cheque for £25

[ ] I am not a member of ASPiH and enclose a cheque for £105

Choose your workshops

Spaces are limited so we advise you register your preferences early. You can choose 2 workshops from the morning session and 2 workshops from the afternoon session. (Please tick as appropriate.)

Morning Session

Simulation instructor training and establishing Points of Care Simulation programmes across networks

Continuous / Inter-professional simulation in neonatology

Making simulation sustainable

Afternoon Session

Multi-professional / Inter-professional simulation in neonatology

Children as Simulated Patients: Engaging Clinicians in Improving Care for Severely Injured Children

Practical approach to debriefing: use of the OSAD (objective structured assessment of debriefing) tool

Making simulation sustainable
