ASPiH and Laerdal proudly present
A National Inter-Professional Paediatric Simulation Symposium

Developing effective and innovative use of simulation to improve the quality and safety of healthcare.

www.aspih.org.uk

Laerdal has been at the cutting edge of innovative healthcare training since the launch of Resusci Anne in 1960.
Through the creation of high-quality simulation solutions, we are committed to increasing the potential and scope of this most valued training methodology in support of our long held mission - helping save lives.

Simulations as a method for transforming the work environment
Dr. Patrick Kenny (MD), Director - Center for Excellence in Pediatric Resuscitation, Children’s Mercy Hospital, Kansas City, Missouri, USA

Dr. Kenny’s presentation will look at the clinical care limitations undiagnosed in the work environment and examine ways to manipulate the clinical high fidelity simulation scenario to test:
- roles in the process of multi-disciplinary care
- room design
- error recognition and remediation of immediate safety threats in the process of multi-disciplinary care
- medical decision-making in the process of multi-disciplinary child abuse assessment

Making it all worthwhile - regional, national and international collaboration targeted to direct patient outcomes
Dr. Steven Vintzileos, Transport Consultant (Paediatric Lead), Embryonic Vortices & Humdrum Aeroplanes & Children’s Transport Service

Dr. Vintzileos will be looking at the regional, national and international simulation infrastructure as a context to:
- discuss the importance of focusing on direct patient outcomes
- reflect on the challenges for educators on the shop floor
- understand how the simulation infrastructure can help to achieve this important goal
- identify the obstacles to progress and explore how these can be overcome together

Use of simulation as an educational tool to deliver bad news in pediatrics
Dr. Thomas Baugnon - Medical Doctor (MD), Staff Anaesthesiologist, Anaesthesiology and Paediatric Intensive Care Unit, Necker Hospital for Sick Children – Paris

Dr. Baugnon’s presentation will explore:
- the value of simulation in learning and developing communication skills
- the SPIKEs Protocol for delivering bad news
- the results of a simulated interview associated to a simulated interview to analyse communication skills

Speakers

ASPiH and Laerdal Medical are proud to announce a one day National Inter-professional Paediatric Simulation Symposium. This symposium continues to develop the close working relationship between both organisations and their joint commitment to further develop the effective use of simulation in paediatric healthcare education.

The programme places particular emphasis on inter-professional learning by bringing together experts in this educational approach to present experiences and deliver workshops to further develop best practice.

It is intended that this meeting will offer insights into how and where simulation can successfully be implemented to deliver effective, collaborative and consistent multi-disciplinary team performance to enhance patient care and to create a national inter-professional community of practice.

Friday 8th March 2013
8am – 6pm
Radisson Blu Hotel, Manchester Airport, Chicago Avenue, Manchester M90 3RA

Delegate Fees:
ASPiH Member: £85
Non ASPIH Member: £115*
*to include membership of ASPIH for twelve months

Laerdal Medical Ltd
Laerdal House Goodmead Road, Chiswick, West, London, W4 5SR

11.45 – 12.45 Plenary Sessions

Dr. Libby Thomas, Simulation and Education Fellow, NHS Trust
Dr. Jane Runnacles, Paediatric Specialist Registrar, Kingston Hospital
Dr. David Grant, Director - Bristol Paediatric Simulation Programme
Professor Ralph MacKinnon, Royal Manchester Children’s Hospital

"Making simulation sustainable"

- Recognising and sharing examples of good practice in simulation
- Discussing the application of the OSAD (objective structured assessment debriefing) tool across the OSAD (objective structured assessment debriefing) tool
- Understanding how to use OSAD in your everyday simulation practice
- Understanding the importance of debriefing in simulation
- Embedding the OSAD tool in general practice and education

As places are limited, please register early by completing and returning this section of the form with your cheque made payable to: Association for Simulated Practice in Healthcare (ASPiH) and return to Christine Spencer, ASPiH PO Box 262, Chevening Lane, DH1 9JG to be sure that you don’t miss out. If you have any queries about this symposium, you can contact Christine on 01473 650797 or e-mail info@aspih.org.uk.

I would like to attend this symposium on Friday 8th March 2013. Please tick the box of the following:

- I am a member of ASPiH and enclose a cheque for £85
- I am not a member of ASPiH and enclose a cheque for £115
