

HMS experience in Mansa District - Zambia

Martha Ndhlovu

MNH Technical Advisor - Jhpiego

Introduction

- In May 13 to 15 2013, Jhpiego organized a regional training summit in Zambia for 40 MNH Expert and Master Trainers in Helping Mothers Survive (HMS): Bleeding after Birth
- New Jhpiego training approach that uses Low Dose, High Frequency Jobsite practice to improve performance of midwives, nurses, physicians and other maternal newborn frontline health workers

Introduction

- Designed to be delivered in facilities in a single day to all providers assisting with or conducting births and can be used hand in hand with Helping Babies Breathe.
- Each trainer was sent home with a new MamaNatalie simulator and set of training materials as seeds to scale up HMS efforts in their countries.

Implementation in Mansa

- In June 2013, we had a three day PPH training introducing the use of Misoprostol (pretesting the Miso training package)
- Provided a prime opportunity to introduce HMS to trainers and participants in the district
- Oriented three facilitators who were going to co - facilitate
- Trained 25 health care providers

Participants

Estimating Blood Loss

Mentorship

- Two mentors were then encouraged to use HMS during their mentorship programs
- They began to incorporate it in the mentorship visits
