SimManager™

SimManager is a comprehensive solution developed to improve the effectiveness and efficiency of simulation and training programs by managing and streamlining their operations and educational initiatives.

Calendar activities, create assignments, and watch how SimManager reports on all aspects of simulation center activity and utilization.

SimManager
Making Simulation Easier

SimManager™

Operational Efficiency

- SimCenter Calendar captures data and gives you access to manage activities at multiple simulation and training center locations
- Quickly schedule simulation or training events. Add details such as resources and personnel to build a complete picture of all activity
- Standardize roles and processes so you can optimize your simulation center productivity
- Bring all information into one application to eliminate duplication of tasks

Learning Acceleration

- Easily create individual and group assignments. Monitor and test progress to learning objectives
- Build a transcript of completed simulation and training activities which can include simulator debrief logs
- Student Document Management so students can upload assignments or other materials for instructor viewing
- Monitor progress and performance to stated learning objectives to increase the effectiveness of educational programs leading to accelerated onboarding and clinical performance

Reporting and Integration Features

- Simulation and training-specific reports which can be scheduled and e-mailed to key personnel
- Report on assigned activity for any period by department, group, event or resource
- Allow users to build a transcript of activities and performance
- Evaluate and document performance improvement over time
- Integrate with SimStore™ content, SimView™, Laerdal Simulators, SimPad® manikins, and QCPR® Manikins

Operation

- 100% web-based application
- Access center activity and data from anywhere you have an internet connection
- Roles-based features to allow for greater organization of staff and students
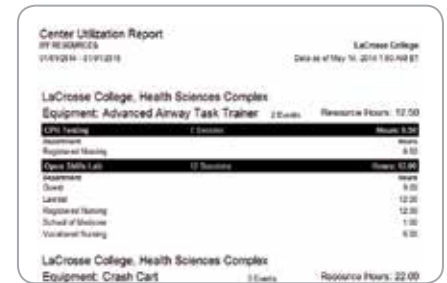

Services

- Guided implementation process to gather the information needed to build your SimManager website and upload user data
- Help is available with services such as onsite, telephone, and email support, implementation advice, personalized services and training

The SimManager calendar is an intuitive tool to gather data and provide quick access to key event information and frequent administrative tasks

Manage and track the usage of your durable resources such as simulators, task trainers, and equipment. SimManager automatically checks for resource conflicts across all event recurrences.

Comprehensive enterprise reporting so you know exactly who is using your simulation and training center to include activities, students, personnel and resources

With SimEvents administrative staff can quickly calendar activities to block schedules. Resources, personnel, topics and activities can be added at any time. Students can be assigned individually or by group.

Student interface allows a quick view of upcoming classes and assignments. Students can build a complete transcript of simulation activities plus upload documents for viewing by the instructor.

Integrate with Laerdal Instructor Applications, LLEAP, SimPad, QCPR Manikins, and SimView to display the data log and other debriefing files. Files can be commented on by the instructor and made viewable to students.
