

Laerdal Medical, one of the world's leading providers of Healthcare Solutions, is dedicated to helping save lives. Laerdal serves healthcare providers and educators with products and services for Basic Life Support, Advanced Life Support, Simulation, Airway Management, Immobilization, Patient Care, Self-directed Learning and Medical Education.

Technical Product Manager - Medical Devices Therapy Product Platform

What you will do

Based in Stavanger, Norway, you will work with business management and other technical specialists that include Mechanical, Electronics, Software, and Design & Human Factors across our medical device product portfolios.

You will use your considerable skills to help us maintain and improve our technical product specifications for our therapy portfolios. We work within a changing regulatory environment, where increasing scrutiny is placed on manufactures to demonstrate compliance to regulations and standards.

About you

You hold a relevant bachelor or master's degree in engineering or related technical field, and have a minimum of 3 years' experience working in technical product support in medical devices and/or a biotech manufacturing environment.

You are able to demonstrate a good understanding of the medical device directive, relevant product standards and have experience of participating within FMEA, root cause investigations and risk management activities.

You are organized, systematic and fluent in English (oral and written)

About your colleagues

You will work in a diverse multi-cultural environment with people who strive to 'help save lives'. We value each other's professionalism and enthusiasm and enjoy solving complex challenges. We are rewarded with a competitive work package and benefits.

For more information about this position contact Jules Eilledge on +47 51511909/+47 47624350.

Send your application with a current CV, designated 'Technical Product Manager – Medical Devices' to hr@laerdal.no
Closing date is 08.01.15.
