

Laerdal Medical, one of the world's leading providers of Healthcare Solutions, is dedicated to helping save lives. Laerdal serves healthcare providers and educators with products and services for Basic Life Support, Advanced Life Support, Simulation, Airway Management, Immobilization, Patient Care, Self-directed Learning and Medical Education.

## Web Developer – Online Business

Our team of highly skilled IT professionals contributes in many ways to achieve our ambitious goal: Helping Save Lives. To better support our global mission, a key focus is to extend and improve our platform for online content and e-Commerce. We are now looking for a talented Web developer to strengthen our Web team.

Would you like to shape the development of an online business platform for a global company? Do you like to influence how Web technology can drive our business in the future? Are you looking to design and build exciting solutions that will be used throughout the organization and by our end-customers? Are you someone who likes to take ownership and continually improve the systems that power our business? Then this might be just the position you have been looking for:

### The Position (main responsibilities):

- Design and develop new components for our Web solution
- Draft and implement improvements to the overall platform architecture
- Research and apply latest technologies and best practices
- Work closely with other teams to advise on and facilitate solid system-to-system integrations
- Provide professional technical guidance for our daily Web operations

### The Candidate (desired profile):

You are analytic and comfortable to think out of the box. You know how to adhere to guidelines but you value flexible and pragmatic solutions that just work. You communicate well and like to present ideas to audiences with variety of different backgrounds. You are social, open, and appreciate a friendly and supportive environment where shared knowledge helps everyone grow. Additionally, you should have the following skills:

- Bachelor degree or higher in Software Development/Computer Science or similar
- Minimum 2 years experience in Web development
- Experience with and a solid understanding of software architecture
- In-depth experience with
  - C#
  - SQL
  - HTML, CSS, JavaScript, jQuery, Ajax
  - REST and/or SOAP Web Services
  - Microsoft .Net
  - Experience with Unit Testing a plus
- Ability to transform technical solutions into a rewarding user experience
- Ability to lead other developers when required
- Fluent in English, written and oral

The position reports to our Web Developer Manager located in Stavanger. If you have questions related to the position, please contact Web Developer Manager Jochai von Baumgarten, +47 51 51 16 12/ +47 468 26 469 or Corporate IT Manager Simon Dreyer, +47 51511708/+47 48019738.

Send applications with CV to [hr@laerdal.no](mailto:hr@laerdal.no) within January 20th 2015. Please type "WEB Developer" in the subject line along with your name.
