## Supply Chain Analyst

**The Supply Chain Management function** focuses on designing, developing and managing the distribution and logistical systems from our own manufacturing units and finished goods suppliers to the end customer. The EMEA region is today served by own operated distribution centers in the UK and Norway and a larger 3PL operated DC in the Netherlands.

We are looking for a candidate with strong analytical and problem solving skills to further develop our supply chain processes and flows. The position is based in Stavanger, Norway.

### **The Position** (key responsibilities):

- Deliver reports and analysis related to supply planning and inventory optimization
- Demand planning and administration of regional Demand Management data
- Active support of the EMA Logistics team and collaboration with local sales units, and regional sales management
- Participation in different projects where SCM expertise is required

### **The Candidate** (desired skills and experience):

We are looking for a candidate with a University degree in Supply Chain Management or related field, with minimum 3 years of relevant experience. You also need to have

- Excellent knowledge of supply chain management concepts and methodology
- Strong general understanding of ERP systems
- Competence in applying statistical methods and advanced Excel modeling skills
- Positive attitude and ability to build relations and work cross-functionally in an international environment
- Excellent communication skills with proficiency in written and spoken English (Norwegian is a plus)
