

Laerdal Medical, one of the world's leading providers of Healthcare Solutions, is dedicated to helping save lives. Laerdal serves healthcare providers and educators with products and services for Basic Life Support, Advanced Life Support, Simulation, Airway Management, Immobilization, Patient Care, Self-directed Learning and Medical Education.

Project Manager – Product Development Projects

We are seeking to strengthen the Project Management Team and are looking to fill a Project Manager position focused on project development projects. The position is located in Stavanger.

As a Project Manager, you are accountable for managing projects in Product Development that will deliver new products and solutions to solve unmet user needs and support our mission Helping Save Lives.

As a Project Manager you are accountable for:

- Execution of the project management process according to the Laerdal Project Management framework, best practices, professional standards & Laerdal standard
- Ensuring control, predictability and quality in the projects
- Ensuring quality is delivered in projects by engaging line management, review processes and the right testing
- Support building the global Project Management network in Laerdal Medical

The candidate:

We are searching for a candidate with a degree in Engineering – Master of Science and 3-4 years of proven leadership skills. Relevant experience and other capabilities can compensate for the lack of a master degree.

- Project management experience of large, complex and cross functional projects
- Project management competence and excellent communication skills
- Ability to successfully operate across all functions and build a network in the organization
- Organized, systematic and fluent in English (oral and written)

For more information about the position, contact Anne Kari Hooker on +4791876889

Please submit your application and CV to hr@laerdal.no within **June 10th 2015**. Please type "Project Manager" in the subject line along with your name.
