

Laerdal Medical, one of the world's leading providers of Healthcare Solutions, is dedicated to helping save lives. Laerdal serves healthcare providers and educators with products and services for Basic Life Support, Advanced Life Support, Simulation, Airway Management, Immobilization, Patient Care, Self-directed Learning and Medical Education.

## Senior Product Developer / Engineer Mechanical

### What you will do

Based in Stavanger, Norway with our Advanced-Patient-Simulator team you will use your considerable technical and product development skills to help us improve our current products as well as develop the next generation.

### About you

You hold a relevant degree and have a passion for product development and desire to understand customer needs and challenges. You are innovative, highly motivated and able to work equally well alone or within a team setting; you really shine at leading small and dynamic technical teams to 'get the job done'. Ideally, you have experience with medical or consumer or automotive products and understand development and manufacturing processes. You routinely apply technical investigation (root-cause), problem solving, and risk management in the process. Your role includes:

- Hands-on prototype build
- Creating/editing technical specifications, CAD and drawings (mechanical assemblies and components)
- Design for function & use, endurance & environment
- Design for service & compliance (regulatory)
- Design for manufacturing & assembly (molded, stamped, cast & machined components)
- Integration of electro-mechanical components (PCA, cables, hydraulic and pneumatic systems)
- Testing & Verification (planning, testing and reporting)
- Managing bills-of-materials, Coordinating manufacturing and purchasing activities
- Managing Engineering Changes & PDM/PLM – Product Data Management / Product Lifecycle Management
- Leading development teams; driving your design through our facility, from raw material to packaged product

### About your colleagues / environment

You will work in a diverse multi-cultural environment with people who strive to help save lives. We value each other's professionalism and enthusiasm and enjoy solving complex challenges together. Your colleagues are inspired to find smart ways to make our products better and enjoy a great working environment that includes a brand new workshop, test laboratory, vacuum-casting, 3D printing and Toolroom.

### Accepting the challenge

For more information about this position contact Ian Hoskins on +47 51511619. Send your application in English with a Cover Letter explaining your suitability and a current CV.
