When every second counts...

## Thomas<sup>®</sup> Select<sup>™</sup> Tube Holder

In the initial critical moments of securing a patient's airway you need a device that you can rely on. The Thomas<sup>®</sup> Select<sup>™</sup> Tube Holder is designed to help you secure any airway device and ensure continued management of the patient's airway whether you use an endotracheal tube or supraglottic device. With the Thomas Select you now have the one go-to device to ensure this critical step of securing the airway is complete.

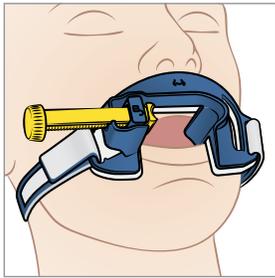

Quick and easy to use, the Thomas Select Tube Holder features a large opening combined with a push-screw mechanism specifically designed to secure a wide range of advanced airways, enabling you to spend less time securing the airway device and more time on what counts – saving lives.

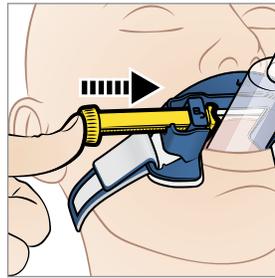

*Securing SGA's (Supraglottic Airways) is recommended by the Journal of Emergency Medical Services as a key component for safe pre-hospital intubation*

# Thomas® Select™ Tube Holder

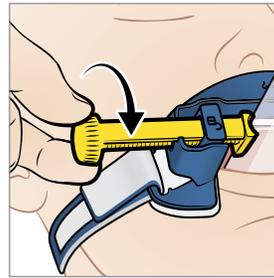

## New features

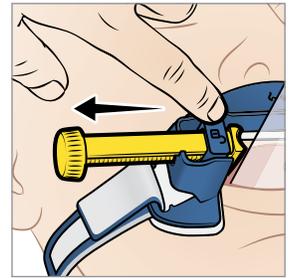

**1. Larger opening**  
The Thomas Select Tube Holder is similar in shape to the Thomas Tube Holder, but has a larger opening to accommodate the wide range of airway tubes on the market. Includes position indicator symbol for correct placement.

**2. Push-screw mechanism**  
Quick and easy to use, a push-screw mechanism on the device for main adjustment. It is no longer necessary to screw all the way to tighten the tube, saving you time when you most need it.

**3. Normal screw mechanism**  
For final securement of the tube, the screw can be tightened as usual.

**4. Quick Release**  
For a quick release of the tube clamp, simply push the unlock button.

## Additional features and benefits

Large mouthpiece surface area	<ul style="list-style-type: none"> <li>- Accommodates patients with removed dentures or facial trauma</li> <li>- Large opening allows for view of patient's mouth and lip color</li> <li>- Easy access for suctioning and other oral care needs</li> </ul>
