

Laerdal Medical, one of the world's leading providers of Healthcare Solutions, is dedicated to helping save lives. Laerdal serves healthcare providers and educators with products and services for Basic Life Support, Advanced Life Support, Simulation, Airway Management, Immobilization, Patient Care, Self-directed Learning and Medical Education.

Advanced Product Development Summer 2018

Laerdal Medical develops and produces exciting and meaningful products where different technologies come together. Our patient simulators are advanced combinations of mechanics, mechatronics, sensors, electronics and software. See www.laerdal.com

This summer we are looking for fourth year master students with interest and knowledge within mechatronics, electronics, microcontroller software, sensors and software for PCs and Apps. Candidates with multidiscipline skills and interests will be preferred.

The work period will typically be mid June until mid August. We offer competitive pay and extremely interesting jobs.
