Please follow all the steps to the upgrade carefully. Otherwise, problems may occur with performance of the simulator and warranty may be void.

Detatch the legs from the torso before starting the upgrade. Use this Upgrade Kit and the tools included with SimMom to perform the upgrade.

Please note that the Automatic Delivery Module requires LLEAP software to operate.
1. REMOVE THE LEGS

2.
REMOVE THE ABDOMEN SKIN

1. Lift the abdomen skin.
2. Remove the abdomen skin.
3. Pull the skin upward.
4. Ensure the skin is removed correctly.
