

SimPad® PLUS System

Easy to set up, transport and use, SimPad® PLUS System is a cost-effective tool that makes simulation available at your fingertips- when and where you need it. SimPad PLUS System is an operating device used to control Laerdal manikins and simulators and can be used with task trainers and standardized patients. Whether training in a classroom, simulation lab, emergency department or outdoors, SimPad PLUS System has the flexibility to support a wide variety of training disciplines and can help instructors achieve their learning objectives.

Dual Operating Modes

SimPad PLUS System features two unique ways to control simulations. Instructors can individually adjust parameters for real-time control or use pre-programmed content to reduce their workload and increase standardization.

Manual Mode Operation

Run "on-the-fly" for total control over all parameters or utilize Themes for a more consistent simulation experience. Themes provide a quick and easy way to change the patient's condition with a single "tap".

Automatic Mode Operation

Utilize pre-programmed scenarios for a simple and effective way to run a simulation. The logged events, as well as events detected by the patient simulator, can automatically drive the scenario forward.

SimPad® Plus System

Quality Simulation-Based Education

SimPad® PLUS System allows instructors, new or experienced, to deliver highly-effective simulation-based training. With its intuitive touchscreen interface, mobile design, easy-to-operate scenarios, integrated data log, and compatibility with a wide range of Laerdal manikins, task trainers, and standardized patients, SimPad PLUS System will help achieve learning objectives with greater ease.

Realistic Clinical Experience

Enhance clinical realism and challenge critical thinking skills with dynamic monitoring and patient interaction. The optional touchscreen Laerdal Patient Monitor provides concise clinical feedback and simulates physiological parameters including HR, ECG, SpO2, BP, RR, Temperature, etCO2, and I2 lead. The included headset and microphone will enable effective two-way communication with the patient, adding 'life' to the simulation.

Efficient Debriefing and Evaluation

Use the built-in Log Viewer application for debriefing immediately after a session or incorporate SimView™, SimView™ Mobile, or Session Viewer to utilize video recording alongside the time-stamped event log from your SimPad PLUS handheld remote and patient monitor to increase the educational impact of debriefing.

SimCenter™

Visit www.mysimcenter.com to learn how to optimize your simulation training using SimCenter and SimPad PLUS System.

SimStore™

Access to validated, standardized content from industry experts

SimManager™

A suite of online tools that allows you to fully optimize your entire simulation center operation

SimView™

An integrated debriefing solution giving you the ability to study simulation events more closely

Services

Laerdal offers comprehensive Educational Services to support implementing SimPad PLUS System into your curriculum, and a Protection Plan to safeguard your SimPad PLUS handheld remote.

Upgrade Your Simulation Program

Still using VitalSim? Take your simulation program to a new level! With SimPad PLUS System, you can apply more functionality to your existing simulation products and transform your training into a truly immersive simulation experience.
