Use of Mask with Oxygen

Place Head Strap

Changing Filter

Remove Used Filter

Hold Mask and pull Filter outwards and sideways, so it separates from Mask.

Place the mask on a flat, non-slip surface and insert a new filter. Firm pressure is required to assure that the filter is properly attached.

Note:
- The mask can be used without filter.
- Ensure the mask is folded when changing filter.

Cleaning and Disinfection

Warning: The One-way Valve and Filter are designed for single patient use only. Do not re-use. Re-use will lead to increased risk of micro contamination, deterioration of performance, and/or device malfunction. Laerdal is not responsible for any consequences of re-use.

Mask can be cleaned and disinfected, and reused after careful cleaning and training and patient use.
1. Wash and scrub in warm soapy water.
2. Rinse in clean water for min. 1 min.
3. Soak for 10 min in a 0.5% Sodium Hypochlorite solution.
4. Rinse under running tap water for 3 min.
5. Allow to dry completely.

Patient Use

The mask can be re-used after it has been cleaned and disinfected according to instructions. The One-way Valve and Filter must be discarded after single patient use.

Cautions

- Do not pasteurize, boil or steam autoclave.
- Not made with natural rubber latex.
- Use of Mask with Oxygen

Remove Used Filter

Hold Mask and pull Filter outwards and sideways, so it separates from Mask.

Place the mask on a hard, flat surface and insert a new filter. Firm pressure is required to assure that the filter is properly attached.

Note:
- The mask can be used without filter.
- Ensure the mask is folded when changing filter.

**Intended Use**
The Pocket Mask is designed for mouth-to-mask ventilation of a non-breathing adult, child or infant.

**Important Information**

**RX Only (US)**
Caution: Federal law restricts this device to sale by, or on the order of a physician.

This device should only be used by persons who have received adequate training.

Read this User Guide and become familiar with the operation of the product prior to use of the product only as described in the User Guide.

Observe all warnings, cautions and instructions. Retain this booklet for future reference.

Other ventilation equipment, e.g. a bag-valve mask or oxygen powered resuscitator, may be coupled to the 15 mm connection port (without the One-way Valve) of the Pocket Mask.

**Warnings and Cautions**

A Warning states a condition, hazard, or unsafe practice that can result in serious personal injury or death.

A Caution states a condition, hazard, or unsafe practice that can result in minor personal injury or damage to the product.

---

**Items Included**
