SimCapture

A learning management solution for healthcare simulation and education

SimCapture allows you to effectively manage, record, and assess simulation training, both on-site and in-situ. Capture audio, video, annotations, patient monitors, and simulator data in a single web-based interface.

The solution enables medical schools, nursing schools, and hospitals to deliver high-quality training, education, and quality improvement programs.

Over 500 healthcare institutions in more than 35 countries use SimCapture to generate reports and statistics on performance and trends to improve administration, track usage, and learning outcomes. And, since SimCapture is mobile-friendly, you can do this anywhere and anytime.

SimCapture

A Scalable Platform

PRO

Ideal for new or smaller simulation centers seeking an affordable solution to record, debrief and track simulation learning.

ENTERPRISE

For larger or more established simulation centers that need to manage, assess and report on departments, learners and events.

CCM

The Central Control Module is ideal for standardized patient programs and interdisciplinary simulation centers utilizing OSCEs that require large-scale workflow automation.
