

# SonoSim Product Catalog for International Distribution by Laerdal

**June 2022**

# SonoSim® Starter Edition

Product ID	Product Name	Product Description
SonoSim Product ID 200-9501-SDE / Laerdal Catalog ID 390-00575	SonoSim Starter Edition	The Starter Edition is designed to introduce learners to the foundational concepts and basics of ultrasound. This Edition includes the Fundamentals of Ultrasound as well as five years of SonoSim Care. Customers can also add on additional modules to fulfill their training needs.

# Preconfigured Bundles

 <p>Laerdal Catalog ID 390-00700</p>	Obstetrics & Gynaecology Bundle	<p>This Bundle is an add-on to the Starter Edition that is specifically designed for OB/GYN training needs. Includes the following modules:</p> <ul style="list-style-type: none"> <li>Bladder: Anatomy &amp; Physiology</li> <li>Breast: Anatomy &amp; Physiology</li> <li>Female Pelvis: Anatomy &amp; Physiology</li> <li>Liver: Anatomy &amp; Physiology</li> <li>Biliary Tree: Anatomy &amp; Physiology</li> <li>GI Tract: Anatomy &amp; Physiology</li> <li>Renal: Anatomy &amp; Physiology</li> <li>Bladder: Core Clinical</li> <li>OB/GYN: Core Clinical</li> <li>Renal: Core Clinical</li> <li>Intestinal/Biliary: Core Clinical</li> <li>First-Trimester Pregnancy: Advanced Clinical</li> <li>Second- and Third- Trimester Pregnancy - Part I: Advanced Clinical</li> <li>Second- and Third- Trimester Pregnancy - Part II: Advanced Clinical</li> <li>GYN Ultrasound of Nonpregnant Normal Uterus: Advanced Clinical</li> <li>GYN Ultrasound of Nonpregnant Abnormal Uterus - Part I: Advanced Clinical</li> <li>GYN Ultrasound of Nonpregnant Abnormal Uterus - Part II: Advanced Clinical</li> <li>GYN Ultrasound Nonmalignant Adnexal Conditions: Advanced Clinical</li> <li>GYN Ultrasound Normal Adnexa: Advanced Clinical</li> <li>GYN Ultrasound Malignant Adnexal Conditions: Advanced Clinical</li> </ul>
 <p>Laerdal Catalog ID 390-00750</p>	Needle Guided Bundle	<p>This Bundle is an add-on to the Starter Edition that is specifically designed for needle-guided procedure training. Includes the following modules:</p> <ul style="list-style-type: none"> <li>Arm-Arterial: Anatomy &amp; Physiology</li> <li>Arm-Venous: Anatomy &amp; Physiology</li> <li>Cerebrovascular: Anatomy &amp; Physiology</li> <li>Leg-Arterial: Anatomy &amp; Physiology</li> <li>Leg-Venous: Anatomy &amp; Physiology</li> <li>Soft Tissue: Anatomy &amp; Physiology</li> <li>Introduction to Ultrasound-Guided Procedures: Procedure</li> <li>Peripheral Venous Access: Procedure</li> <li>Ultrasound-Guided Femoral Line Placement: Procedure</li> <li>Ultrasound-Guided Internal Jugular Vein Cannulation: Procedure</li> <li>Ultrasound-Guided Subclavian Vein Cannulation: Procedure</li> </ul>

# Core Clinical Modules

SonoSim Product ID  
200-1000-SDE  
/  
Laerdal Catalog ID  
390-504133

Product Name  
Fundamentals of  
Ultrasound: Core  
Clinical Module

Product Description

This Fundamentals of Ultrasound Module will teach you the basic principles of ultrasonography. This module provides comprehensive didactic, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1005-SDE  
/  
Laerdal Catalog ID  
390-504136

Product Name  
Airway: Core  
Clinical Module

This Airway Module will teach you how to assess the upper airway and surrounding structures with sonography and how to localize endotracheal tube positioning. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1010-SDE  
/  
Laerdal Catalog ID  
390-504141

Product Name  
Aorta/IVC: Core  
Clinical Module

This Aorta/IVC Module will teach you how to perform ultrasonography of the aorta and inferior vena cava. This module provides comprehensive didactic, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1015-SDE  
/  
Laerdal Catalog ID  
390-504143

Product Name  
Bladder: Core  
Clinical Module

This Bladder Module will teach you how to use sonography to assess the bladder and surrounding structures. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1020-SDE  
/  
Laerdal Catalog ID  
390-504147

Product Name  
Cardiology: Core  
Clinical Module

This Cardiology Module will teach you the basics of point-of-care echocardiography. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1025-SDE  
/  
Laerdal Catalog ID  
390-512338

Product Name  
eFAST Protocol: Core  
Clinical Module

This eFAST Protocol Module will teach you how to perform an extended focused assessment for trauma (FAST) scan. This Module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1030-SDE  
/  
Laerdal Catalog ID  
390-504131

Product Name  
FAST Protocol: Core  
Clinical Module

This FAST Protocol Module will teach you how to perform a focused assessment for trauma (FAST) scan. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1035-SDE  
/  
Laerdal Catalog ID  
390-504150

Product Name  
Intestinal/Biliary: Core  
Clinical Module

This Intestinal/Biliary Module will teach you how to use sonography to evaluate the hepatobiliary system, appendix, and small and large bowel for normal and pathologic conditions. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

# Core Clinical Modules

SonoSim Product ID  
200-1040-SDE  
/  
Laerdal Catalog ID  
390-504155

Musculoskeletal: Core  
Clinical Module

This Musculoskeletal Module will teach you how to use sonography to assess soft tissues, joints, bones for pathology. This module provides comprehensive didactic, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1045-SDE  
/  
Laerdal Catalog ID  
390-504158

OB/GYN: Core Clinical  
Module

This OB/GYN Module will teach you how to use sonography to evaluate first-trimester pregnancies and basic gynecologic conditions. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1050-SDE  
/  
Laerdal Catalog ID  
390-504166

Ocular: Core Clinical  
Module

This Ocular Module will teach you how to use sonography to assess the anterior and posterior segment of the eye. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1060-SDE  
/  
Laerdal Catalog ID  
390-504172

Pulmonary: Core  
Clinical Module

This Pulmonary Module will teach you how to use sonography to assess a variety of normal and pathologic pulmonary conditions. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1070-SDE  
/  
Laerdal Catalog ID  
390-504178

Rapid Ultrasound in  
Shock: Core Clinical  
Module

This Rapid Ultrasound in Shock (RUSH) Protocol Module will teach you how to use sonography to assess the soft tissues of the body for normal and pathologic conditions. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1065-SDE  
/  
Laerdal Catalog ID  
390-504406

Renal: Core Clinical  
Module

This Renal Module will teach you how to use sonography to assess the upper urinary tract and surrounding structures. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1075-SDE  
/  
Laerdal Catalog ID  
390-504182

Soft Tissue: Core  
Clinical Module

This Soft Tissue Module will teach you how to use sonography to assess the soft tissues of the body for normal and pathologic conditions. This module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

SonoSim Product ID  
200-1058-SDE  
/  
Laerdal Catalog ID  
390-200-1085

DVT - Lower Extremity:  
Core Clinical Module

This DVT Module will teach you sonographic evaluation of lower extremity deep vein thrombosis (DVT), including both first-time and recurrent DVTs. This Module provides comprehensive didactic instruction, knowledge assessment, and hands-on training.

# Anatomy & Physiology Modules

SonoSim Product ID  
200-2000-SDE  
/  
Laerdal Catalog ID  
390-504137

Adrenal Glands:  
Anatomy & Physiology  
Module

This Adrenal Glands: Anatomy & Physiology Module begins with an overview of the role of ultrasound in the evaluation of adrenal glands. A brief overview of adrenal gland anatomy and physiology is provided. The sonographic anatomy of the adrenal glands is described in detail. Optimal transducer selection, patient positioning, imaging approaches, and techniques for sonographically evaluating the adrenal glands are discussed. The course concludes with imaging tips and pitfalls and a summary of salient teaching points.

SonoSim Product ID  
200-2005-SDE  
/  
Laerdal Catalog ID  
390-504390

Ankle: Anatomy &  
Physiology Module

This Ankle: Anatomy & Physiology Module begins with an overview of the role of ultrasound in the evaluation of the ankle. A brief overview of ankle anatomy and physiology is provided. The sonographic anatomy of the ankle is described in detail. Optimal transducer selection, patient positioning, imaging approaches, and techniques for sonographically evaluating the ankle are discussed. The course concludes with imaging tips and pitfalls and a summary of salient teaching points.

SonoSim Product ID  
200-2010-SDE  
/  
Laerdal Catalog ID  
390-504212

Aorta/IVC: Anatomy &  
Physiology  
Module

This Aorta/IVC: Anatomy & Physiology Module begins with an overview of the role of ultrasound in the evaluation of the aorta and IVC. A brief overview of aorta and IVC anatomy and physiology is provided. The sonographic anatomy of the aorta and IVC is described in detail. Optimal transducer selection, patient positioning, imaging approaches, and techniques for sonographically evaluating the aorta and IVC are discussed. The course concludes with imaging tips and pitfalls and a summary of salient teaching points.

SonoSim Product ID  
200-2015-SDE  
/  
Laerdal Catalog ID  
390-504144

Arm-Arterial: Anatomy  
& Physiology Module

This Arm-Arterial: Anatomy & Physiology Module begins with an overview of the role of ultrasound in the evaluation of the upper extremity arterial system. A brief overview of upper extremity arterial anatomy and physiology is provided. The sonographic anatomy of the upper extremity arterial system is described in detail. Optimal transducer selection, patient positioning, imaging approaches, and techniques for sonographically evaluating the upper extremity arterial system are discussed. The course concludes with imaging tips and pitfalls and a summary of salient teaching points.

First-Trimester  
Pregnancy: Advanced  
Clinical Module

This First-Trimester Pregnancy: Advanced Clinical Module provides an in-depth review of the sonographic evaluation and monitoring of normal embryologic development, including multiple pregnancies, and pathologic conditions that arise in the first trimester of pregnancy. This didactic knowledge is assessed with in-module questions and an end-module mastery test. The patented SonoSimulator® will help you develop the requisite hands-on psychomotor skills and cognitive task awareness required to optimally perform first trimester pregnancy ultrasound.

Second- and Third-  
Trimester Pregnancy  
- Part I: Advanced  
Clinical Module

The Second- and Third-Trimester Pregnancy – Part I: Advanced Clinical Module provides an in-depth review of the sonographic evaluation and monitoring of normal embryologic and fetal development, including multiple pregnancies, and pathologic conditions that become evident in the second- and third-trimester of pregnancy. This didactic knowledge is assessed with in-module questions and an end-module mastery test. The patented SonoSimulator® will help you develop the requisite hands-on psychomotor skills and cognitive task awareness (e.g., fetal biometry) required to optimally perform second- and third-trimester pregnancy ultrasound.

Second- and Third-  
Trimester Pregnancy  
- Part II: Advanced  
Clinical Module

This Second- and Third-Trimester Pregnancy – Part II: Advanced Clinical Module provides an in-depth review reinforcing the use of fetal biometry to evaluate fetal development of singleton and multiple pregnancies, weight discrepancies, amniotic fluid volume indexes, and maximal vertical pocket identification during the second- and third-trimesters of pregnancy. Sonographic assessment of fetal presentation, placenta, and placental location are discussed. Pathologic conditions such as intrauterine growth restriction and fetal macrosomia are described in detail. This didactic knowledge is assessed with in-module questions and an end-module mastery test. The patented SonoSimulator® will help you develop the requisite hands-on psychomotor skills and cognitive task awareness required to optimally perform second- and third-trimester pregnancy ultrasound.

Focused Cardiac  
Ultrasound (FoCUS) -  
Part I: Advanced Clinical  
Module

This Focused Cardiac Ultrasound (FoCUS) - Part I: Advanced Clinical Module provides an in-depth review of Doppler-mode echocardiography, including M-mode, color-flow, pulsed-wave and continuous-wave Doppler imaging. The sonographic techniques used to obtain specific echocardiography image views such as the RVIT, apical 5C, apical 3C, and apical 2C views are described in detail. The use of these views to obtain a variety of parameters including LVOT diameter, VTI, CO, SV, peak RVSP, and peak PASP is explained. Didactic knowledge is assessed with in-module questions and an end-module mastery test. The patented SonoSimulator® will help you develop the requisite hands-on psychomotor skills and cognitive task awareness required to use Doppler-mode echocardiography to assess the heart and obtain useful physiologic data.

Focused Cardiac  
Ultrasound (FoCUS)  
- Part II: Advanced  
Clinical Module

This Focused Cardiac Ultrasound (FoCUS) – Part II: Advanced Clinical Module explores the use of focused cardiac ultrasound to detect and assess valvular heart disease (i.e., aortic, mitral, tricuspid, and pulmonary valvulopathy). Standard and advanced cardiac imaging windows (e.g., suprasternal) and imaging views, including apical two-chamber, apical three-chamber, RVIT, and RVOT views, are described. The use of color-flow, pulsed-wave, and continuous-wave Doppler for evaluating valvular pathology is explained.

GYN Ultrasound of  
Nonpregnant Normal  
Uterus: Advanced  
Clinical Module

This SonoSim® Advanced Clinical Module begins with an overview of normal female pelvic anatomy and physiology, and common indications for pelvic ultrasonography. Optimal transducer selection, patient preparation and positioning, and proper ultrasound transducer disinfection techniques are reviewed. A complete description of the use transabdominal and transvaginal ultrasound techniques to examine a variety of uterine conditions is provided. The Course concludes by introducing the Z-technique as a method of reconstructing the midcoronal plane of the uterus.  
*\*Includes Transvaginal Probe Attachment*

GYN Ultrasound  
of Nonpregnant  
Abnormal Uterus - Part  
I: Advanced Clinical  
Module

This SonoSim® Advanced Clinical Module begins with an overview of sonographic imaging of the nonpregnant female uterus, including 3D ultrasound and the Z-technique for reconstruction of the midcoronal plane of the uterus. The 2D and 3D ultrasound evaluation of congenital uterine malformations is discussed. Sonographic evaluation of adenomyosis and leiomyomiasis discussed and the role of 2D and 3D ultrasound is defined. The Module concludes with a discussion of the Intrauterine device (IUD) localization.  
*\*Includes Transvaginal Probe Attachment*

GYN Ultrasound  
of Nonpregnant  
Abnormal Uterus - Part  
II: Advanced Clinical  
Module

This SonoSim® Advanced Clinical Module overviews the classifications and potential causes behind abnormal uterine bleeding and discusses techniques to evaluate the endometrium. The course thoroughly looks at imaging characteristics, diagnostic criteria, relevant Doppler adjuncts, and widely accepted management guidelines of pertinent endometrial conditions; these conditions include endometrial polyps, submucosal leiomyomas, endometrial adhesions, retained products of conception, arteriovenous malformations, subinvolution of the placental site, endometrial cancer, endometrial hyperplasia, and the effect of tamoxifen on the endometrium.  
*\*Includes Transvaginal Probe Attachment*

GYN Ultrasound  
Normal Adnexa:  
Advanced  
Clinical Module

This SonoSim® Advanced Clinical Module begins with an overview of normal female adnexal anatomy and physiology. Optimal transducer selection, patient preparation and positioning, and proper ultrasound transducer disinfection techniques are reviewed. A complete description of the use of transabdominal and transvaginal ultrasound techniques to examine the normal female adnexa is provided. The Course concludes by introducing common adnexal findings that are a part of normal female physiology.  
*\*Includes Transvaginal Probe Attachment*

GYN Ultrasound  
Nonmalignant Adnexal  
Conditions: Advanced  
Clinical Module

This SonoSim® Advanced Clinical Module begins with an overview of various types of ovarian cysts, including simple, complex, and hemorrhagic cysts; endometriomas; dermoid cysts; and ovarian fibromas. The sonographic evaluation and management of extraovarian adnexal conditions, including pedunculated leiomyomas, hydrosalpinx, tubo-ovarian abscesses, peritoneal inclusion cysts, and adnexal torsion, are also thoroughly discussed.  
*\*Includes Transvaginal Probe Attachment*

390-700010

GYN Ultrasound  
Malignant Adnexal  
Conditions: Advanced  
Clinical Module

This SonoSim® Advanced Clinical Module overviews both pre- and postmenopausal adnexal anatomy and how to sonographically differentiate between likely benign, indeterminate, and likely malignant adnexal conditions. Lessons also cover comprehensive examination of borderline and likely malignant adnexal lesions with a review of ovarian cancer and current cancer screening methods.  
*\*Includes Transvaginal Probe Attachment*

Neonatal & Infant  
Neurosonography:  
Advanced Clinical  
Module

This Neonatal & Infant Neurosonography: Advanced Clinical Module teaches the fundamental elements of how to perform neonatal and infant neurosonography. The course begins with a thorough overview of the neuroanatomy of preterm and term neonates and infants, and explores the clinical indications for sonographic examination. Subsequent lessons provide an in-depth review of sonographic neuroanatomy and imaging techniques, and introduce several more commonly encountered pathologic conditions.

Vascular Mapping for  
Preoperative Planning  
of Dialysis Access:  
Advanced Clinical  
Module

This Advanced Clinical Module provides an in-depth understanding of using ultrasound to perform vascular mapping as part of preoperative planning for dialysis access. The Course explores the use of ultrasound to survey upper extremity vasculature and determine the most desirable hemodialysis access site for arteriovenous fistula or graft creation. Relevant anatomy of the upper extremity vasculature, imaging protocols, and the various types of arteriovenous fistulae and grafts are discussed. In-module questions and a final mastery test assess didactic knowledge.

LVAD Problem-Focused  
Echocardiography:  
Advanced Clinical  
Module

This LVAD Problem-Focused Echocardiography: Advanced Clinical module will provide you with an in-depth understanding of the role of bedside echocardiography in the evaluation of an LVAD patient with acute clinical decompensation. The Course explores the mechanics of various LVAD types, as well as LVAD complications and how to determine underlying etiology. Problem-focused echocardiographic technique is described for assessing the initial evaluation and management of LVAD patients suffering acute clinical decompensation.

Resuscitative TEE:  
Advanced Clinical  
Module

This Resuscitative TEE: Advanced Clinical Module provides an introduction to the use of transesophageal echocardiography (TEE) in the resuscitation of the patient in cardiac arrest. The online didactics discuss Resuscitative TEE indications, regional anatomy, echocardiographic anatomy, image acquisition techniques for resuscitative TEE examination. The patented SonoSimulator® helps develop the requisite cognitive task awareness necessary to perform TEE. SonoSim SkillBox® cases along with two real-patient cases are included.
