

Essential Cardiac Auscultation

A single focused online source to learn the most important cardiac auscultatory findings

“The Big 12” - Selected from national surveys of program directors and findings emphasized by certification boards

Essential Cardiac Auscultation

- Created in response to learner needs and requests
- Teaches cardiac auscultation and pathophysiology
- Tested at multiple medical centers throughout the curriculum
- Trains students, residents, physicians, physician assistants, nurses and nurse practitioners
- Cost-effective - saves faculty time
- Accessible on PC and Mac

Findings are presented using Harvey,
The Cardiopulmonary Patient Simulator
